PG&E CREWS WORK ON RECONSTRUCTION IN WAKE OF DOBBINS FIRE

A fire near Dobbins, CA (Yuba County) was sparked by a bird in a power line on Aug. 14. The fire burned nearly 3900 acres before it was contained, according to the California Department of Forestry and Fire Protection. The fire threatened a power house and transmission lines and destroyed two residences. IBEW Local 1245 thanks member Gabriel Andrade for sending these four photos of PG&E crews engaged in reconstruction.
